

Lift Magnets - Battery Powered

BUX BM2 Magnets

These magnets are compact, mobile, self-contained using a heavy duty 12 volt battery. Operating on this battery source they are free of restrictive cords and wires. They also have the added advantage of being useful in areas where electricity is not available. They have convenient push buttons on the front panel and an I/R remote that operates up to 15 feet.

STANDARD FEATURES:

- Battery Charger has an automatic cut-off to prevent over-charging battery.
- Audible Warning Alarm & Flashing Light indicates low battery.
- Interlock prevents magnet de-energization when suspended in air.

Applications include handling of plates, die blocks, machined components, smooth castings and forgings. They are extremely useful in shipping and receiving areas, storerooms, on cut-off saws, burning and welding tables, and with other machine tools such as grinders, shapers and drill presses.

Model Number	Lift Capacity (lbs) (Flat Stock Only)	Length (in.)	Width (in.)	Height to Crane Hook (in.)	Net Weight (lbs)	Ship Weight (lbs)
BUX BM2-13	0 - 3,000	16.3	8.6	22	190	200

BUX BP-7 & BP-15 Magnets

The **BUX BP-7 & BP-15 Magnets** have a uniquely designed plate shoe that enables the handling flat, round and shaped materials. These magnets are equipped with convenient front panel push buttons and I/R remote that operates from up to 15 feet.

These units are ideally suited for handling pipe, bar stock, billets, I Beams, H Beams, angles, channel, Tees, Zees and pilings.

Their bi-polar configuration allows these units to also handle plates, forgings and castings.
